Chapter 1 Introduction

Welcome and thank you for choosing Digital Surveillance System of WIEW.

Digital Surveillance System is the perfect security solution for home, office, or other place. You can monitor live camera video indoor, and also view the camera remotely; with the Motion Detection and I/O Alarm, intruder or any suspicious event will be recorded in digital video.

Features:

- Enhanced MPEG-4 Compression Technologies;
- Supports up to 32 Channel Cameras per PC;
- Video & E-Map Display Model;
- Camera Mask:
The Camera can be hid to the User who no view right and the recording video can't be playback too
- Smart Recording Video Search Playback;
- Advanced Motion Detection;
- Networking
Support Multi-Levels Control;
Remote view and control PTZ through LAN, Internet;
Remote talk;
- Audio Recording;
- Watermark;
- Watchdog;

Chapter 2 System Requirements

- ✧ Intel Pentium IV CPU or above, AMD Athlon CPU or above, or compatible CPU which supports MMX technologies.
- ✧ 256M system RAM OR above.
- ✧ Display Card: Geforce or ATI chip is recommended.
- ✧ OS: Microsoft Windows 2000 or Windows XP

Chapter 3 Capture Card & Driver Installation

- Step 1: Turn off your computer power before installing video capture cards.
- Step 2: Install video capture cards in open PCI slots.
- Step 3: Turn computer on and Insert the software CD in the CD-ROM drive.
- Step 4: Windows will recognize the new hardware as shown.
- Step 5: Windows will now prompt you to let it search for the device drivers. This is the preferred method. Please click "Next".
- Step 6: Windows XP will find the correct driver on your CD-ROM. (With other versions of Windows you may have to direct it to the folder that corresponds with your Operating System). Select the first driver and click "Next".
- Step 7: Windows will then warn you that our driver has not passed Windows Logo Testing. Click "Continue Anyway".
- Step 8: Click "Finish".
- Step 9: If there is more than one card installed, repeat Step 5 to Step 8 until all drivers have been installed.

To make sure the Hardware Installation was completed properly, please check your Device Manager. You should find the correct number of Device Drivers listed under Sound, Video and Game Controllers before proceeding with Software Installation.

TIP: If Windows does not recognize one or more of your video capture cards, please do the following:

1. Clean the contacts of the video capture board with a clean pencil eraser to remove any residue.
2. If you are still having trouble, try another PCI slot.

Chapter 4 Server Software Installation

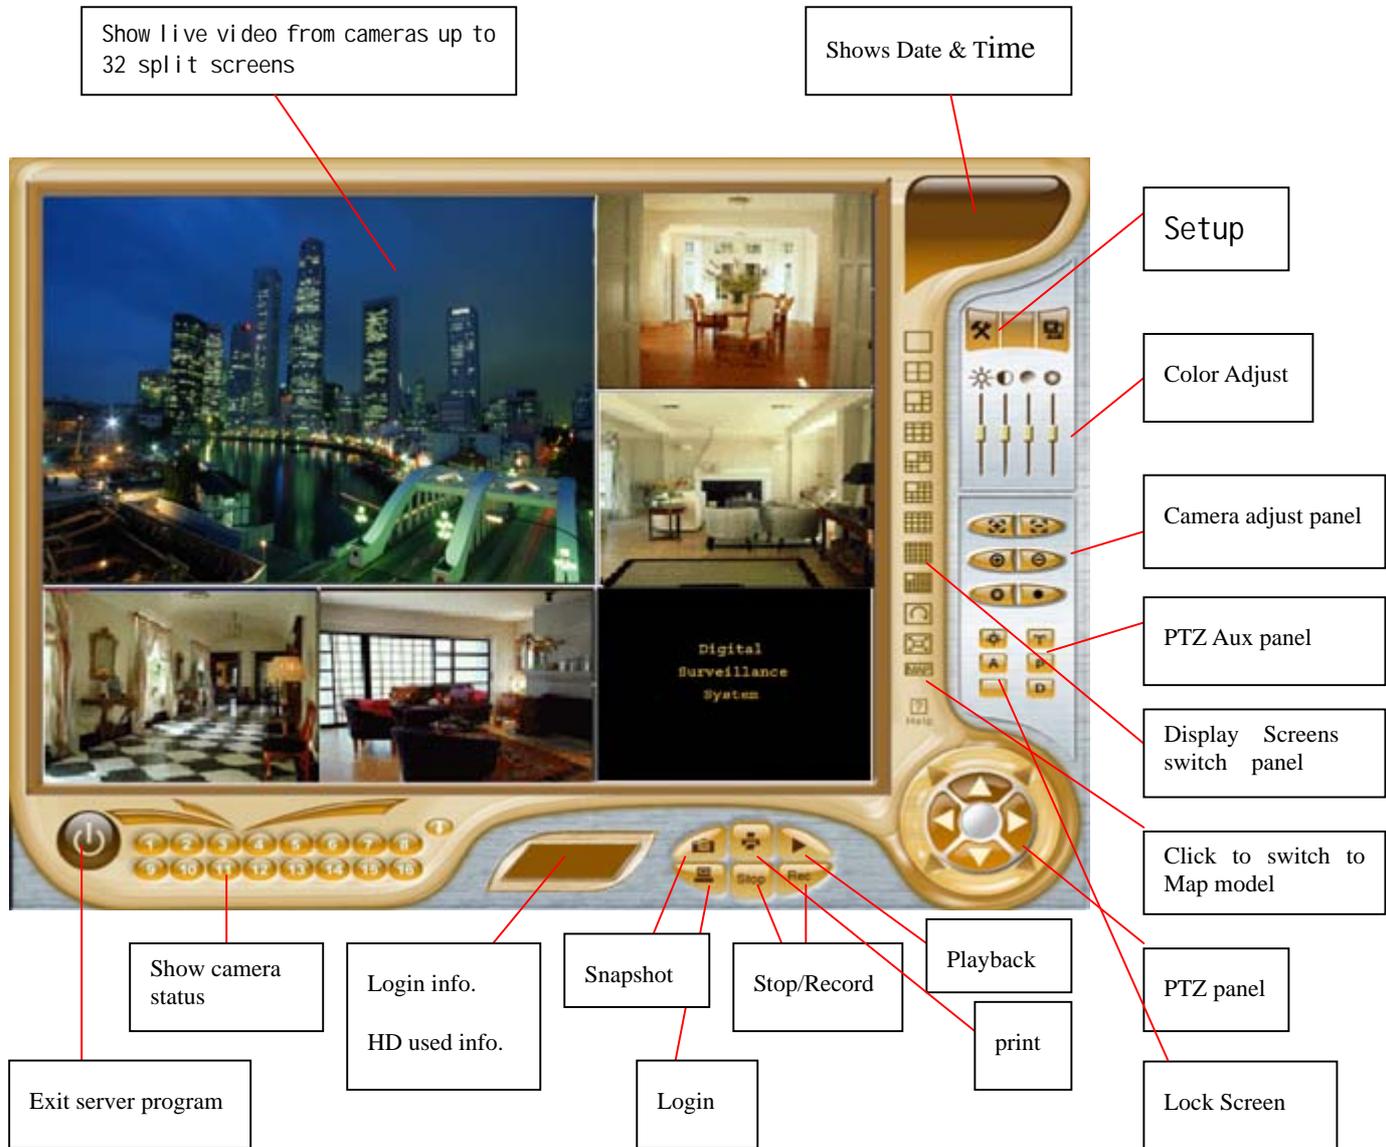

Insert the software CD in the CD-ROM drive.

Double-click on the folder of [Server].

Double-click on the s_install icon to begin installation.

After rebooting your computer, you will find a shortcut for the SVDVR program in your "START" menu, listed under "All Programs". You may now run the program as desired.

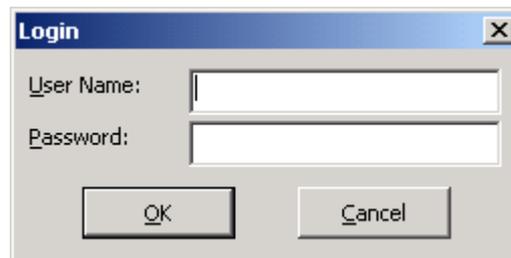

Chapter 5 Server Software Guide

Launch SVDVR program, will show this image for seconds:

Then display this dialog box:

When login, please input User Name & Password

The default User Name : dvr Password : dvr

(Note : The DVR has an Administrator User Name : admin (keeps all rights) ,
default Password : 1234

It is recommended to change default Password to prevent all user's rights!

If User Name & Password input correct, Click "OK" to login SVDVR.

Click “Save” to save the image;

Event Log :

Event Log record all the system run status, you can view the log by Date, Filter;

Select “ watermark ” ,the watermark will show on screen

Chapter 6 **Client Software**

Client Software allows you to view remote camera,control remote PTZ,even playback remote camera recording.

Client Software Installation:

Insert the software CD in the CD-ROM drive.

Double-click on the folder of [Client].

Double-click on the c_install icon to begin installation.

After rebooting your computer, you will find a shortcut for the Clenr program in your "START" menu, listed under "All Programs". You may now run the program as desired.

Client Software Guide:

There are two model client GUI, one is “Panel Client GUI”,
the other is “Full Screen Client GUI”;

Run Client program, will show this box first.

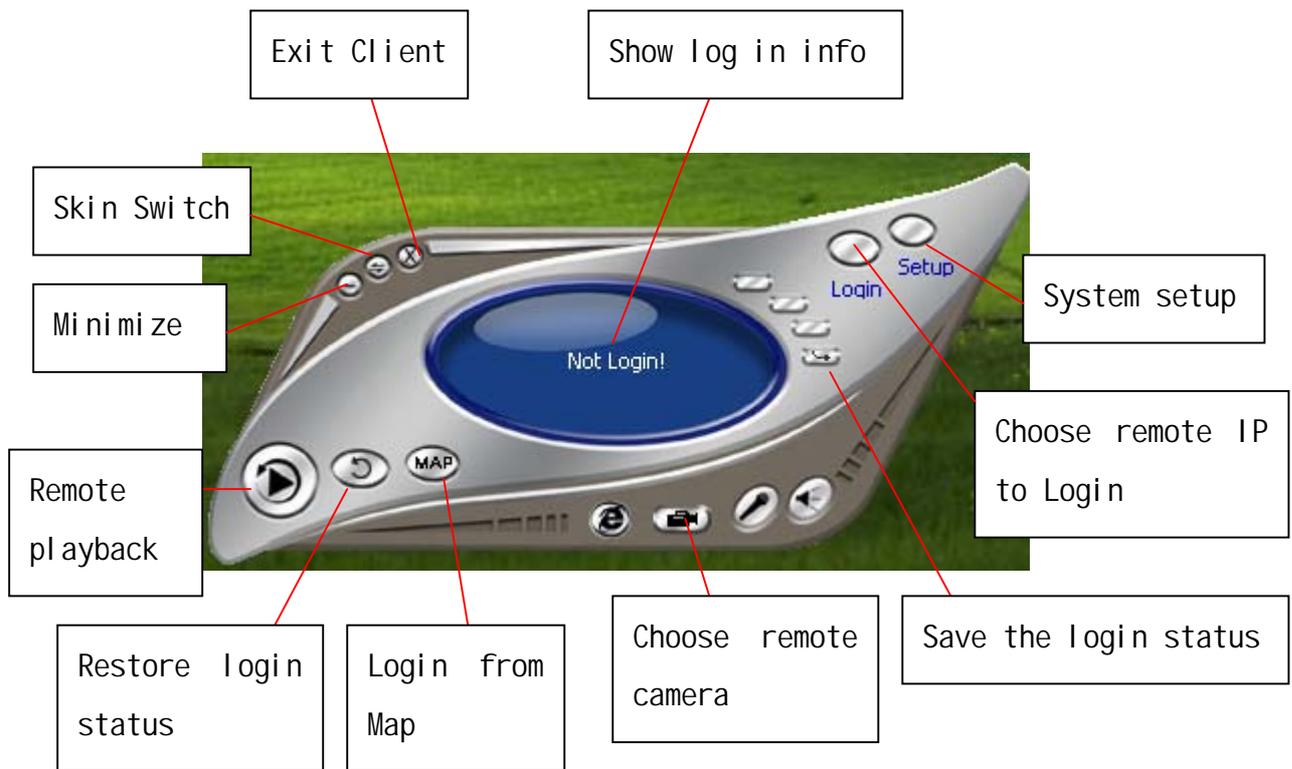

User Name: default is: dvr

Password: default is: dvr

This User Name & Password prevent the client program not be run by others;
Click “Modify” button, You can modify the User Name & Password personally,

Panel Client GUI :

Setup :

Click "Setup" button to set up system;

New Host:

Input Server's PC IP, click "Add IP" to add new remote Server;

Host Info:

Choose remote Server IP from dropdown menu to edit;

Host Name:

To define remote server name which will show on video box title;

User Name & Password:

The input User Name & Password must be defined in Client-User of remote Server's Setup;

Default is:

User Name: dvr ; Password: dvr

Select net model: LAN or Internet

If select LAN , support UDP multicast function;

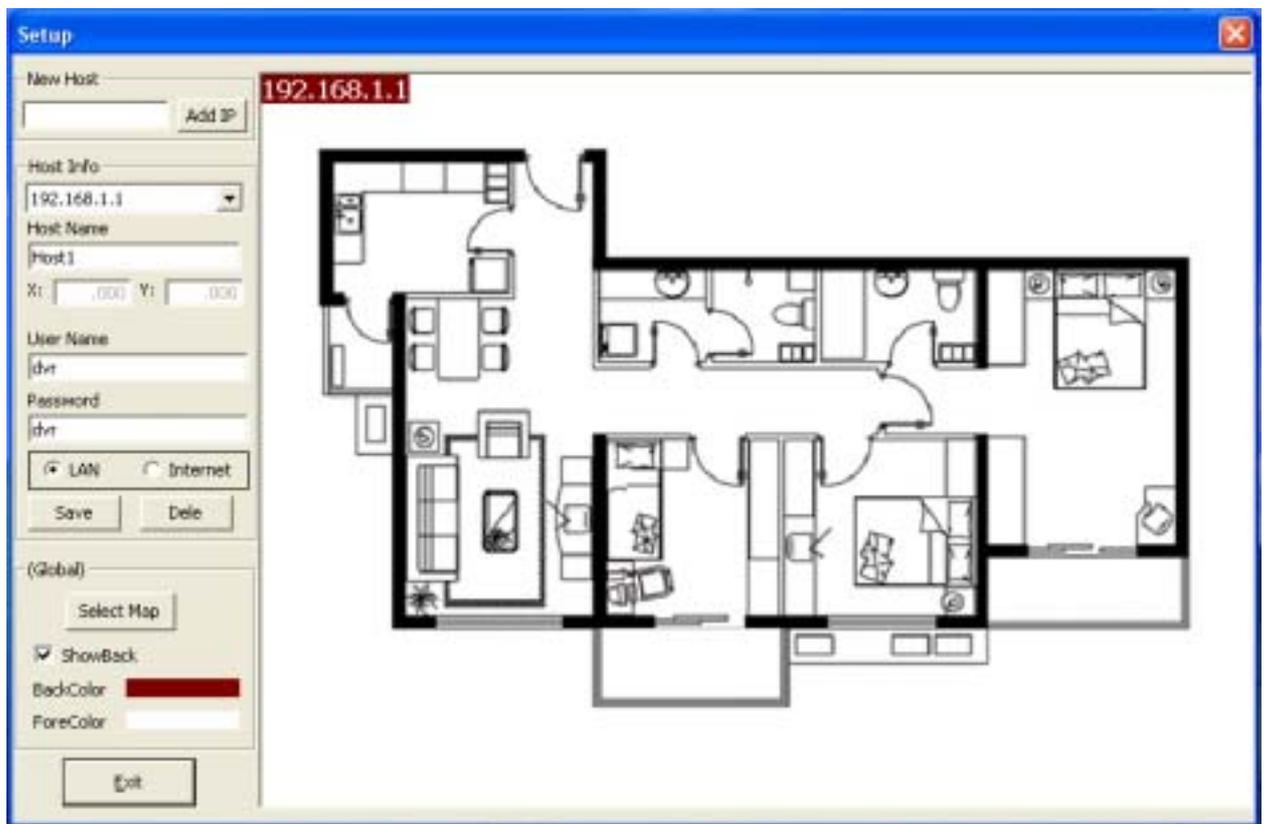

Click “ Save ” to save the setup;

Click “ Dele ” to delete the selected server setup information;

Client software support E-Map Login;

Click “ Select Map ” to import map image;

Dragging Server IP to the corresponding place;

Click “ Exit ” button to exit;

Click “ Login ” button to choose the Server IP which you want to log in;

If login ok, the “ Show Login info ” panel will show “ Login Success! ” ;

If login failure, the “ Show Login info ” panel will show “ Login Fail! ” ;

Click  button to choose the camera which you want to view;

Click  button to record at client site;

Click  button to stop recording at client site;

Click  button to control remote PTZ;

You can change the video screen size just by dragging rightdown corner(left button of mouse down);

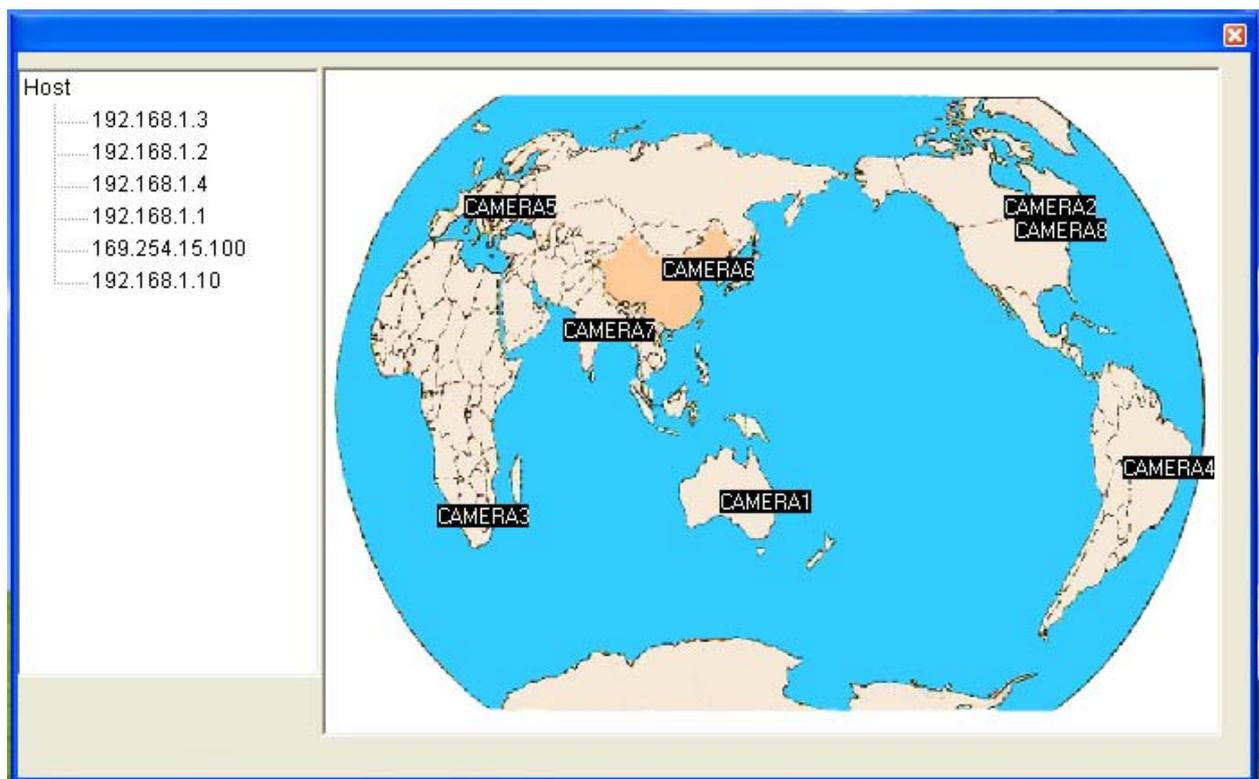

Click  button to save the current login status;

If not login , click  button to restore the last login status and

automatically login;

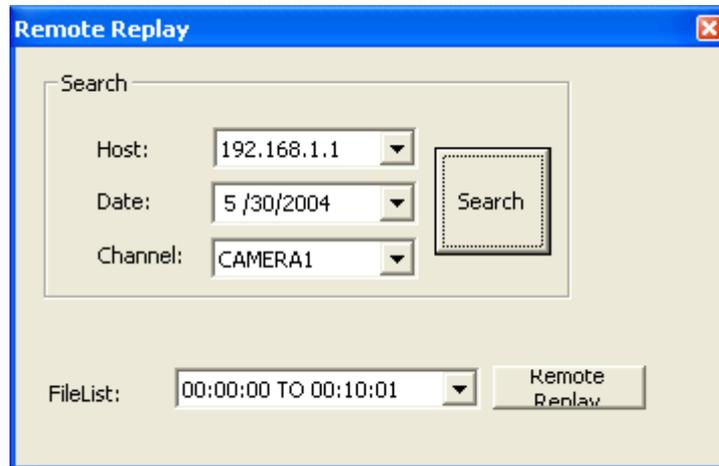

Click  button to login from E-Map;

Click the Server IP on map, will auto login, then click the camera number will show the corresponding video;

Click button to playback the recording of remote Server;

Host: choose the remote Server IP;

Date: select the date;

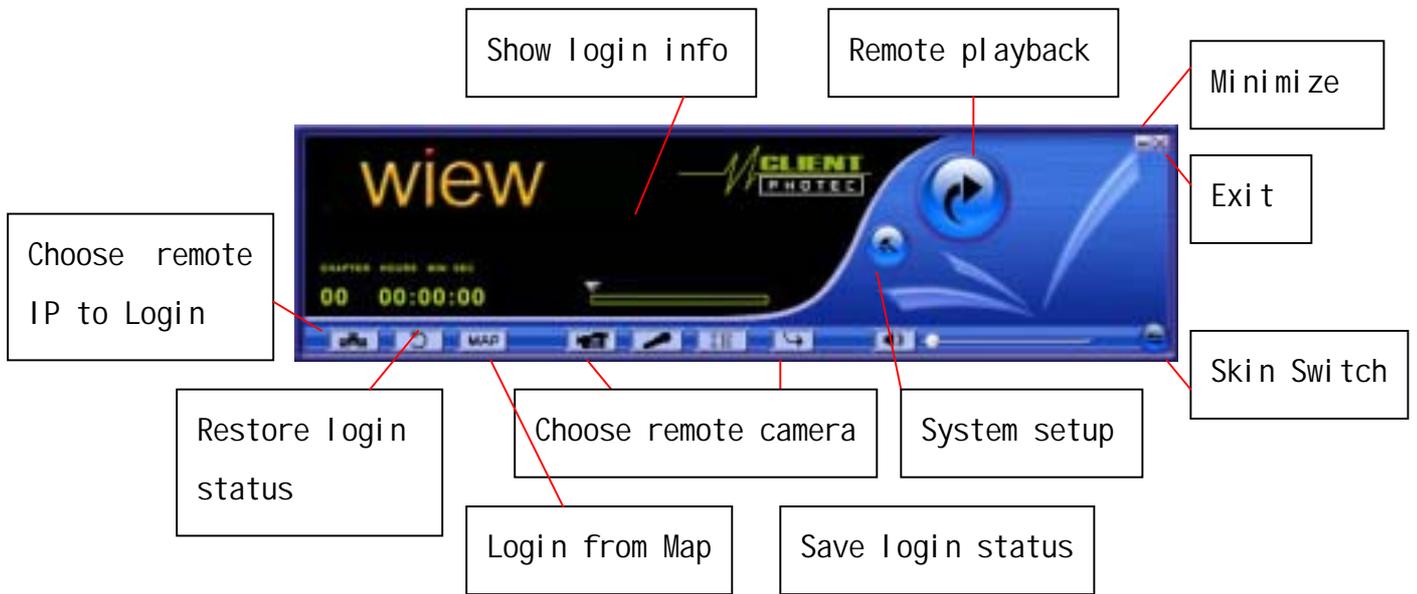

Channel: choose the camera number;

Click "Search" button to find, if getting, the files name will show at "FileList";

Choose the file , then click "Replay" button to play;

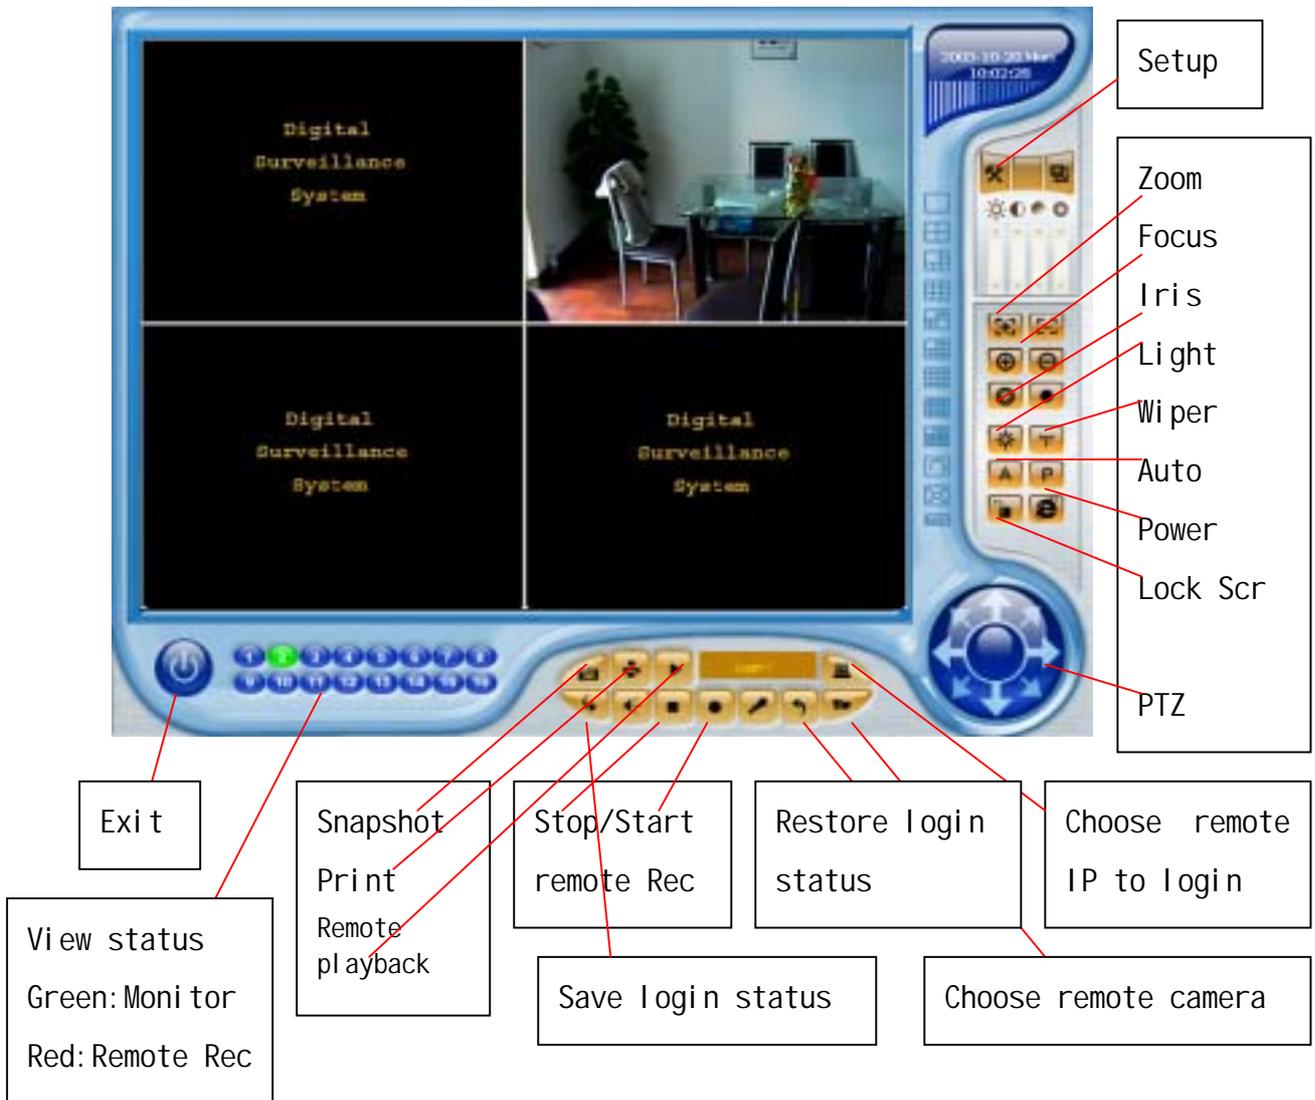

Panel Client GUI has another Skin

Click  button to change Skin

Full Screen Client GUI :

The function of Full Screen Client program is same as that of Panel Client;

Putting mouse at the video for seconds will show the video information (Server IP & Camera number).
